

**ONIX ASIGURARI SA**

**Financial statements**

**prepared in accordance with EU International Financial Reporting Standards  
as at 31 December 2021**

## INDEPENDENT AUDITOR'S REPORT

Attn: The shareholders of the company ONIX ASIGURARI SA

### Opinion

We have audited the attached Financial Statements of the Company **ONIX ASIGURARI S.A.** (hereinafter called „**The Company**”), headquartered in Bucharest, Sector 1, 2 Daniel Danielopolu Street, registered with the Trade Registry under no. J40 / 7361 / 2012, fiscal code no.: RO 10509908, which includes the balance sheet as at **31 December 2021**, the profit and loss statement, the statement of changes in equity, the cash flow statement for the year then ended, as well as a summary of the significant accounting policies and the explanatory notes.

The financial statements as at **31 December 2021** are as follows:

Net assets / Total equity:	173.936.003 lei
Net profit for the period	57.954.753 lei

In our opinion, the accompanying financial statements present a true and fair view of the Company's financial position as at **31 December 2021** and of its financial performance and cash flows for the year then ended, in accordance with the International Financial Reporting Standards (**IFRS**), the provisions Rule of the Financial Supervisory Authority (**FSA**) no. 19 / 2015 on the application International Financial Reporting Standards by the companies insurance, insurance – reinsurance and reinsurance, with subsequent amendments and completions (hereinafter “**Rule ASF 19 / 2015**”).

### Basis of opinion

We conducted our audit in accordance with International Standards on Auditing (**ISA**). Our responsibilities under those standards are further described in the "*Auditors' Responsibilities for the Audit of the Financial Statements*" section of our report. We are independent of the Company in accordance with the Ethical Code of Professional Accountants issued by the International Ethics Standards Board for Accountants (**IESBA** Code), together with the ethical requirements that are relevant to our audit of the financial statements in Romania and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Key audit matters

The key audit matters are those issues which, based on our professional judgement, proved to be of the greatest importance for conducting the audit of the current financial statements. These matters have been addressed in the context of the audit of the financial statements as a whole and in forming our opinion on these financial statements, and we do not provide a separate opinion on these matters. In addition to the matter described in the *Basis for Opinion* section, we were able to determine that the issues described below constitute key audit matters that need to be communicated in our report.

### Evaluation of the technical reserves

As at 31.12.2021, the Company's records show gross technical reserves amounting to 142.893.584 lei (On 31.12.2020: 137.251.830 lei)

See Note 1.4.13 "Accounting policies and methods - General insurance business - Technical reserves"; Note 18 "Technical reserve"

Key matter	Our approach to this key matter during the audit
<p>As described in Notes 18, the Company recorded as at 31.12.2021 technical reserves in the amount of 142.893.584 lei, representing 58,15% of the total debts. The technical reserves cannot be accurately assessed, but only estimated in the light of the reasoning based on the latest credible information available. The estimation of the technical reserves involves significant reasoning regarding the uncertainty of future results, mainly the total settlement value of the claims reserves, assumptions related to the damage rate, frequency of the average claim of damages, the average cost per claim, these representing key input data in estimating the claims reserves.</p>	<p>Our audit procedures included, but were not limited to:</p> <p>We evaluated the internal methodologies established by the Company in accordance with the principles for determining the amount of the technical reserves instructed in the ASF Rule no. 38/2015 and in IFRS 4.</p> <p>We evaluated and tested (based on a sample) how were the internal controls on the process of estimating the value of the technical reserves designed and their effectiveness.</p>
<p>The Company creates and maintains the technical reserves in accordance with ASF Rule no. 38/2015 regarding the technical reserves established for the insurance activity, the method of calculating them for the purpose of preparing the annual financial statements and the special register of assets covering them (ASF Rule no. 38/2015) and IFRS 4 "Insurance contracts" (IFRS 4).</p>	<p>We involved our actuarial experts to evaluate and test:</p> <ul style="list-style-type: none"> <li>✓ the assessment of the compliance of the estimation methodology used to determine the value of technical reserves</li> <li>✓ the reconciliation of the databases containing details regarding the determination of the RBNS and IBNR claims reserve with the existing data in the Company's accounting records</li> <li>✓ the assessment based on our professional judgment of whether the Company's management estimates were adequate</li> </ul>
<p>The gross premium reserve, amounting to 122.683.544 lei (31.12.2020: 115.221.912 lei), is calculated monthly by summing the shares of the gross written premiums related to the unexpired periods of the insurance contracts. Their value at the end of the financial year represents the part of gross written premiums for which the risk is reported in the following financial year.</p>	<ul style="list-style-type: none"> <li>✓ evaluation of the IBNR method and estimated value for the reference date 31.12.2021 by using the estimated damage rate method;</li> <li>✓ the critical assessment of the assumptions used by the Company's management to estimate the value of the technical reserves by comparing them with our knowledge of the legal regulations in force, the Company's specific circumstances and by testing the accuracy of the process based on which the Company has developed its forecasts.</li> </ul>
<p>The gross reserve for RBNS claims to 31.12.2021 is zero lei (31.12.2020: 12.417.218 lei), because the company does not appear with damages reported in the course of liquidation.</p>	
<p>The reserve for IBNR claims, amounting to 9.944.388 lei (31.12.2020: 2.756.284 lei), represents the fund set up to settle the future obligations of the insurer resulting from the damages incurred, but not reported until the reference date of the calculation of the reserves.</p>	<p>We assessed whether the Notes to the financial statements disclose in an adequate manner the technical reserves, according to the relevant financial reporting frameworks.</p>
<p>The reserve of unexpired risks on 31.12.2021 is of 10.265.652 lei (31.12.2020: 6.856.416 lei) and is calculated based on the estimation of the damages that will occur after the closing of the financial year.</p>	
<p>As a result of those mentioned above, we deemed that the valuation of the technical reserves constituted a key audit matter.</p>	

---

**Receivables from recovery related to the claims of damages filed**

---

As at 31.12.2021, the Company's records show receivables from recovery of damage claims and regression in the amount of 14.882.019 lei (31.12.2020: 16.902.140 lei)

---

Note 15 " Other assets "

---

**Key matter**

As described in Note 15 to the attached financial statements, the gross value on 31.12.2021 of receivables from recovery of damage claims is 14.882.019 lei, representing 63,15% of the total gross receivable.

We considered this a key matter due significant share of the value of the receivable from recovery in total gross receivables and to the professional reasoning required in estimating the amounts to be recovered

**Our approach to this key matter during the audit**

Our audit procedures included, but were not limited to:

We have reviewed the Company's internal procedures for estimating the recoverable amount of receivables from regression or recovery and analysed the criteria taken into account by the Company in the process of assessing the amounts to be recovered.

We reviewed the management's forecasts regarding the impairment of these receivables and we assessed their compliance with the applicable accounting regulations.

We reviewed the supporting documentation received from the management regarding the calculation of the forecasts, the calculation of the degree of recoverability of the claims determined for each case, separately, the opinions of the lawyers expressed in the litigation files and we followed the evolution of the files for damage claims throughout the year.

We have reviewed the counter-guarantees used to reduce exposure to impairment risk.

We discussed with the Company's management the methods and professional reasoning applied in order to establish the recoverable amounts, the status of the litigation files and ongoing criminal cases, the Company's intentions to pursue debtors, the expected chances of recovery, alternative methods of recovery and the probability of coverage of any loss of receivables.

---

**Responsibilities of the Management and of Those in Charge with the Governance for the Financial Statements**

The Management of the Company is responsible for the preparation of the financial statements that give a true and fair view in accordance with Rule ASF 19 / 2015 and for such internal control as the management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the management of is responsible for assessing the Company's ability to continue as a going concern, for disclosing, as applicable, matters related to the going concern and using the going concern basis of accounting unless the management either intends to liquidate the Company or cease operations, or has no realistic alternative but to do so.

The persons in charge with governance are responsible for overseeing the Company's financial reporting process.

**Auditors' Responsibility for the Audit of the Financial Statements**

Our objectives consist in obtaining reasonable assurance so as to ascertain whether the financial statements as a whole are free from material misstatement, due to fraud or error, as well as to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISA, we exercise professional judgment and maintain a professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve secrets, forgery, intentional omissions, false statements and avoidance of internal control.
- We understand the internal control relevant to the audit in order to design audit procedures that are appropriate to the circumstances, but without the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- We assess the appropriateness of the accounting policies used and the reasonableness of the accounting estimates and related disclosures made by management.
- We conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate to those in charge with governance, among other matters, the planned scope and timing of the audit and the significant audit findings, including any significant deficiencies in internal control that we identified during our audit.

We also provide those in charge with governance with a statement that we have complied with relevant ethical requirements regarding independence and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, the related safeguards.

Among the issues we have communicated to those charged with governance, we identify those issues that were most important in the audit of the current financial statements and are therefore key audit issues.

We describe these issues in our audit report, unless legislation or regulations prevent the public disclosure of that issue or if, in extremely rare circumstances, we believe that an issue should not be disclosed in our report because it is expected to be reasonable that the benefits of the public interest outweigh the negative consequences of this communication.

### **Report on other legal and regulatory provisions**

We were appointed by contract no. 532 / 05.10.2021, based on the Decision of the Extraordinary General Meeting of Shareholders of 30.09.2021, to audit the financial statements of **ONIX ASIGURARI S.A.** for the financial year ended **31 December 2021**. The total uninterrupted duration of our commitment is two years.

We confirm that:

- Our audit opinion is in accordance with the additional report presented to the Board of Directors of the Company, which we issued on the same date we issued this report. Also, in conducting our audit, we maintained our independence from the audited entity.
- We have not provided the Company with prohibited non-audit services, as referred to in Article 5 paragraph (1) of EU Regulation No. 537/2014.

### Other matters

This report of the independent auditor is addressed exclusively to the Company's shareholders as a whole. Our audit was performed in order to be able to report to the Company's shareholders those matters that we are bound to report in a financial audit report, and not for other purposes. To the extent permitted by the law, we accept and assume no liability other than to the Company and its shareholders, as a whole, for our audit, for this report or for the opinion formed.

### 1.1 The basis of the preparation of the financial statements

The undertaking prepared the financial statements as at 31 December 2020 in accordance with International Financial Reporting Standards („IFRS”) adopted by European Union UE and *regarding the application of International Financial Reporting Standards by the insurance companies, the insurance and reinsurance companies and the reinsurance companies from 30 October 2015* including subsequent amendments and additions and they are dedicated exclusively to the readers who are aware of these regulations.

These financial statements are not presenting the financial position of the company in accordance with the accounting regulations and principles as per *ASF Norm no. 41/2015* and they are not dedicated to the readers interested in this scope (for example the Fiscal Authorities, Trade Registry). For these users, the company has prepared and has presented financial statements in accordance with *ASF Norm no. 41/2015*.

**1 GENERAL INFORMATION (CONT.)****1.1 The basis of preparation of the financial statements (cont.)**

These financial statements are exclusively destined to be used by the company, its shareholders and ASF. In consequence it is possible these financial statements not to be adequate for other purposes.

The financial statements are prepared as per IFRS rules adopted by EU are comprised of the following:

- Statement of comprehensive income
- Statement of financial position
- Statement of changes in equity
- Statement of cash flows
- Notes to the financial statements

**Declaration of conformity**

The company's accounting is kept in Lei (RON) in accordance with Romanian Accounting Standards (RAS). Where necessary, the accounts as per RAS were adjusted to harmonize these financial statements in all significant aspects with IFRS adopted by EU.

The most important changes to the RAS financial statements to order to align them with IFRS requirements adopted by EU adopted by UE and presented in accordance with those standards are:

- The grouping of the elements into more comprising categories
- Adjustments of the assets, liabilities, and equity as per IAS 29 „Financial Reporting in Hyperinflationary Economies”
- Adjustments of the insurance contracts classification as per IFRS 4 – „Insurance contracts”
- Adjustments of the technical reserves (Best estimation) as per IFRS 4 – „Insurance contracts”
- Adjustments of receivables and payables regarding the deferred income tax as per IAS 12 – „Income tax”
- Adjustments of recognition and measurement of the financial instruments as per IAS 39 „Financial Instruments: Recognition and Measurement”
- Adjustments of recognition and evaluation of leasing contracts as per IFRS 16 „Leasing contracts”
- The presentation of the requirements as per IFRS adopted by EU

**1.2 The basis of evaluation**

These financial statements have been prepared based on historical cost convention with the exceptions mentioned by the accounting policies.

**1.3 The principle of continuity**

These financial statements have been prepared based on the principle of continuity, according with the company shall continue to operate into the predictable future. To evaluate the applicability of this presumption, the company management has analyzed the previsions as regard the company activity. Based on these analyses, the management has considered that the company can continue its activity in the predictable future and according to the principle of continuity, the drawn-up of the financial statements is justified.

31 DECEMBER 2021

*(Amounts in Lei)***1 GENERAL INFORMATION (CONT.)****1.4 Significant accounting principles**

The main accounting principles are presented below.

For the preparation of these financial statements, the company followed the IFRS adopted by EU recognition and evaluation principles as per ASF Norm no. 19/2015 including subsequent amendments and additions.

The drawn-up of the financial statements has imposed to utilize a certain essential accounting estimation and the usage of certain reasoning in applying the company's accounting policies. The amounts are in Lei, rounded to the closest value except the cases where it is otherwise mentioned.

**1.4.1 The exchange rate***(a) Functional and presentation currency*

The financial statements are prepared and presented in Lei (RON), representing the functional currency (the currency of the economy where the company has registered its premises).

Exchange rates used to convert monetary balances denominated in other currencies are:

<b>Exchange rate:</b>	<b>31 December 2021</b>	<b>31 December 2020</b>
EUR/ LEI	4.9481	4.8694
PLN/ LEI	1.0768	1.0676
GBP/ LEI	5.8994	5.4201
USD/RON	4.3707	3.9660

*(b) Transactions and accounts balances*

The transactions in foreign currencies are converted in Lei by using the National Bank of Romania (NBR) exchange rates available for the transaction date.

The exchange rates gains and losses resulted from the transactions as well as the foreign currencies monetary assets and liabilities conversion to the exchange rate of year-end are registered in the profit and loss accounts exception made by cases in which they are deferred in other elements of the comprehensive income as risk coverage instruments associated with treasury and net investments flows.

Exchange rate gain and losses are presented in the Statement of the comprehensive income in the position „Net incomes from exchange rate “.

**1.4.2 The accounting method for hyperinflation**

AS per IAS 29 („Financial Reporting in Hyperinflationary Economies”), an entity's financial statements for which the functional currency is a hyperinflationary economy currency, should be presented in the terms of the current purchasing power of the currency updated to the financial statements drawing -up date, so that the non-monetary elements to be amended with the general prices index from the acquisition date or tax due-date.

## 1 GENERAL INFORMATION (CONT.)

### 1.4 Significant accounting principles (cont.)

#### 1.4.2 The accounting method for hyperinflation (cont.)

As of 1 January 2004, the functional currency adopted by the Company ceased to be hyperinflationary.

As per IAS 29 provisions, a national economy is considered hyperinflationary if among other factors the inflation index is over 100% during a period of 3 consecutive years.

The IAS 29 provisions have been applied in drawing-up the financial statements older than 1 January 2004.

#### 1.4.3 Tangible assets

##### *Recognition and evaluation of tangible assets*

Tangible assets comprise from the following categories:

- IT equipment
- Office furniture and autos

The tangible assets from a leasing contract are registered in accounting depending on the nature of the leasing contract as per adopted by EU.

The company's assets are recognized as tangible assets if they fulfill the following conditions:

- They generate future economic benefits meaning they have the potential to contribute directly or indirectly to the company's cash or cash equivalents inflow
- Their destination is to be used in the production process or administrative services for a longer than one year period

The tangible assets are initially evaluated at their acquisition costs

The acquisition cost of tangible assets includes:

- the purchase price, import taxes and other taxes (except those that can be recovered from the tax authorities)
- transport, handling, and other expenses by obtaining authorizations and other expenses that can be directly attributable to the acquisition of the respective goods
- the transport expenses are included in the acquisition cost and when the supply is made by third parties, based on the invoices issued by them
- commissions, notary fees, expenses for obtaining authorizations and other non-recoverable expenses, directly attributable to the respective goods.

##### *Depreciation of tangible assets*

The depreciable amount of an asset is systematically allocated over its useful life, which begins when it is available for use. Depreciation of an asset ceases at the earliest date between the date when the asset is classified as held for sale in accordance with IFRS 5 "Fixed Assets Held for Sale and Discontinued Operations" and the date on which the asset is derecognized. Depreciation does not cease when the asset is not used or decommissioned unless it is fully depreciated.

31 DECEMBER 2021

*(Amounts in Lei)***1 GENERAL INFORMATION (CONT.)****1.4 Significant accounting principles (cont.)****1.4.3 Tangible assets (cont.)**

The tangible assets depreciation is registered based on the straight-line method:

<b>Category:</b>	<b>Years</b>
Office equipment and furniture	3-15
Vehicles	5
IT equipment	3

The improvements made in rented spaces are depreciated during the lease period.

Subsequent improvements related to improvements are capitalized, provided that they extend the life of the asset or lead to a significant increase in its ability to generate revenue.

Maintenance and repair costs are registered as expenses when incurred.

According to IAS 16 “Property, plant and equipment”, an entity does not recognize in the accounting value of an item of property, plant, and equipment the costs of daily maintenance of that item. These costs are recognized in the profit and loss account as they incurred.

*Derecognition of tangible assets*

The accounting value of a tangible asset is derecognized at:

- ceding
- when no future economic benefit is expected from its use or disposal.

The gain or loss resulting from the derecognition of a tangible asset item shall be included in the profit and loss account.

**1.4.4 Intangible assets***Recognition and evaluation*

Intangible assets are regulated by IAS 38 – “Intangible assets”.

Intangible assets held by the Company are recorded at cost, less accumulated depreciation and adjustment for impairment and impairment losses. These are represented by computer applications and licenses.

The cost of an intangible asset acquired separately consists of the purchase price, including import duties and non-refundable purchase taxes, less commercial discounts, plus any costs directly attributable to the preparation of the asset for use.

*Depreciation*

Depreciation of intangible assets is recorded in the profit and loss account, based on the straight-line method for the estimated useful life, and is calculated from the date on which the asset is ready for use.

The useful life of computer programs is 3-5 years.

**1 GENERAL INFORMATION (CONT.)****1.4 Significant accounting principles (cont.)****1.4.4 Intangible assets (cont.)**

According to IAS 38:

- the useful life of an intangible asset arising from contractual rights or other legal rights may not exceed the duration of those rights, but may be shorter, depending on the period in which the company is going to use the asset
- if the rights are granted for a limited period and can be renewed, the useful life includes the renewal period, based on the evidence to justify the renewal by the company, without significant costs.

**1.4.5. Deferred acquisition costs (DAC)**

The expenses for the acquisition of the insurance policies are represented by the expenses with the commissions due to the insurance intermediaries and are registered in the accounting at the moment of underwriting the policies.

The Company calculates and registers the deferred acquisition expenses using the *pro-rata temporis* method, similar to the calculation of the premium reserve.

**1.4.6 Financial assets and liabilities****A. Classification**

The company classifies its financial instruments, according to IFRS 9 "*Financial Instruments*", in the following categories:

*Financial assets evaluated at amortized cost*

A financial asset is evaluated at amortized cost if it meets both of the following conditions and is not evaluated at fair value through profit or loss:

- is held in a business model whose objective is to keep assets for the collection of contractual cash inflows; and
- on certain dates, its contractual conditions generate cash flows that are only payments of the principal and interest related to the principal amount due.

*Financial assets at fair value through other comprehensive income*

A financial asset is measured at fair value through other comprehensive income only if it meets both of the conditions set out below and is not designated at fair value through profit or loss:

- is held within a business model whose objective is achieved both by collecting contractual cash inflows and by selling financial assets; and
- on certain dates, its contractual conditions generate cash flows that represent only payments of the principal and interest related to the principal amount due.

In addition, upon initial recognition of an investment in equity instruments that is not held for trading, the Company may irrevocably choose to present subsequent changes in fair value in other comprehensive income. These options apply to each instrument, as appropriate.

**1 GENERAL INFORMATION (CONT.)****1.4 Significant accounting policies (cont.)****1.4.6 Financial assets and liabilities (cont.)****A. Classification (cont.)**

Financial assets at fair value through profit or loss All financial assets that are not classified as measured at amortized cost or at fair value through other comprehensive income, as described above, will be measured at fair value through profit or loss. In addition, on initial recognition, the Company may irrevocably designate that a financial asset, which otherwise meets the requirements to be evaluated at amortized cost or fair value through other comprehensive income, be evaluated at fair value through profit or loss, if this eliminates or significantly reduces an accounting discrepancy that would occur if it were done otherwise.

**B. Recognition**

Financial assets and financial liabilities are recognized on the date on which the Company becomes a contractual party under the terms of the respective instrument. Financial assets and liabilities are measured at the time of initial recognition at fair value.

**C. Compensation**

Offsetting of financial assets and liabilities and the net result are presented in the statement of financial position only when there is a legal right to set-off and if there is an intention to settle them on a net basis or if the asset is intended to do the asset and debt settlement simultaneously.

Incomes and expenses are presented net only when permitted by accounting standards, or for profit and loss resulting from a group of similar transactions such as those of the company's trading activity.

**D. Evaluation***Valuation at amortized cost*

The amortized cost of a financial asset or debt represents the amount at which the financial asset or debt is measured after initial recognition, less principal payments, plus or minus accumulated depreciation up to that point using the effective interest method, less related to impairment losses.

*Fair value measurement*

The fair value represents the price that would have been received on the sale of an asset or paid to settle a debt in a transaction carried out under normal conditions between the participants on the main market, at the valuation date, or in the absence of the main market, on the most advantageous market to which the company has access to that date.

The Company measures the fair value of a financial instrument using the closing prices quoted in an active market for that instrument. A financial instrument has an active market if quoted prices are available quickly and regularly for that instrument.

The market price used to determine fair value is the closing price of the market on the last trading day before the valuation date.

In the absence of a price quotation on an active market, the Company uses valuation techniques based on the analysis of updated cash flows and other valuation methods commonly used by market participants, using the most of market information, based as little as possible on company-specific information. The company uses valuation techniques that maximize the use of observable data and minimize the use of unobservable data.

**1 GENERAL INFORMATION (CONT.)****1.4 Significant accounting policies (cont.)****1.4.6 Financial assets and liabilities (cont.)****D. Evaluation (cont.)***Fair value measurement (cont.)*

The value of using a valuation model is adjusted based on a number of factors, as valuation techniques do not reliably take into consideration all factors considered by market participants when concluding a transaction. Adjustments are recorded to reflect risk patterns, differences in selling and buying quotes, liquidity risks and other factors.

**E. Identifying and evaluating impairment***Financial assets measured at amortized cost*

The expected credit loss represents the difference between all the contractual cash flows that are due to the company and all the cash flows that the Company expects to receive, updated at the initial effective interest rate.

A financial asset or group of financial assets is impaired as a result of credit risk if one or more events have occurred that have a negative impact on the estimated future cash flows of the assets.

The company evaluates whether the credit risk for a financial asset has increased significantly since the initial recognition based on information, available at no cost or unjustified effort, which is an indicator of significant increases in credit risk since the initial recognition.

The company recognizes in profit or loss the amount of changes in credit losses expected over the life of financial assets as a gain or loss on impairment.

The gain or loss on depreciation is determined as the difference between the accounting value of the financial asset and the present value of future cash flows using the effective interest rate of the financial asset at the initial time.

The company recognizes favorable changes in expected credit losses for the asset useful time as an impairment gain, even if expected credit losses during the useful time are less than the expected credit losses that were included in the estimated cash flows at the initial recognition.

**F. Derecognition**

The company derecognizes a financial asset when the rights to receive cash inflows from that financial asset expire, or when the company has transferred the rights to receive contractual cash flows related to that financial asset in a transaction in which it has significantly transferred all the risks and benefits of ownership.

Any interest in transferred financial assets retained by the company or created for the company is recognized separately as an asset or liability.

The company derecognizes a financial debt when the contractual obligations have been concluded or when the contractual obligations are canceled or expired.

**1 GENERAL INFORMATION (CONT.)**

**1.4 Significant accounting policies (cont.)**

**1.4.6 Financial assets and liabilities (cont.)**

**G. Gains and losses on disposal**

The gain or loss on the disposal of a financial asset or financial liability measured at fair value through profit or loss is recognized in current profit or loss.

Upon derecognition of equity instruments designated in the category of financial assets measured at fair value through other comprehensive income, gains or losses representing favorable or unfavorable valuation differences, recognized in revaluation reserves, are recognized in other comprehensive income (result carried forward representing surplus - IFRS 9).

Upon derecognition of financial assets, the result carried forward from the date of transition to IFRS 9 is transferred to a carried forward result representing realized surplus.

A gain or loss on a financial asset that is measured at amortized cost is recognized in current profit or loss when the asset is derecognized.

**H. Other financial assets and liabilities**

Other financial assets and liabilities are measured at amortized cost using the effective interest method, less any impairment losses.

**1 GENERAL INFORMATION (CONT.)****1.4 Significant accounting policies (cont.)****1.4.7 Assets impairment**

At the end of each reporting period, the Company assesses whether there is objective evidence of impairment of a financial asset or a group of financial assets. A financial asset is impaired and incurs impairment losses if and only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a "loss-making event") and that event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets, an impact that can be reliably estimated.

The company assesses whether there is objective evidence of impairment such as a breach of contract terms, for example, failure to pay premiums.

If there is objective evidence that an impairment loss has been incurred for loans and receivables or held-to-maturity investments at amortized cost, the loss amount is measured as the difference between the accounting value and the recoverable amount of the asset. The accounting value of the asset is reduced by using an impairment adjustment account, which impacts the profit or loss account.

If, at a later period, the recoverable amount of the asset increases and the increase can be objectively related to an event occurring after the recognition of impairment (such as an improvement in the recovery period of receivables), the previously recognized impairment loss is reversed. through profit or loss account.

The methodology and estimates used to calculate the recoverable amount of the asset (the estimate of future cash flows) are periodically reviewed by the company to reduce the difference between the estimated loss and the actual loss.

*Financial Available-for-sale assets*

When a decrease in the fair value of a financial available-for-sale asset has been recognized directly in other comprehensive income and there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity will be reversed from equity accounts and recognized in the income statement even if the financial asset has not yet been derecognized.

The amount of the accumulated loss that is eliminated from other comprehensive income and recognized in the profit and loss account will be the difference between the acquisition cost (net of principal reimbursements and amortization) and the current fair value, less any loss from the impairment of that financial asset, previously recognized in the profit and loss account.

If, at a later period, the fair value of an available-for-sale debt instrument increases, and this increase may be objectively related to an event that occurred after the previous losses recognition in the profit and loss account, the impairment loss must be reversed and the amount recognized in the profit and loss account.

*Impairment of other assets*

Assets that are subject to depreciation are analyzed for impairment whenever events or changes in circumstances occur that indicate that the accounting value is not recoverable. An impairment loss is recognized as the amount by which the accounting value of an asset exceeds its recoverable amount. Recoverable amount is the highest of an asset's fair value less the selling costs and its value in use.

**1 GENERAL INFORMATION (CONT.)****1.4 Significant accounting policies (cont.)****1.4.8 Receivables from insurance**

The receivables from the insurance are initially recognized at the value of the premiums receivable related to each insurance policy, for the period of validity of the policy.

For multi-annual insurance contracts, in which the validity period of the insurance contract related to general insurance is longer than one year, and the collection of the gross written premium is made in several installments (monthly, quarterly, semiannually) established by the insurance conditions. For each insurance year, the receivable from gross written premiums represents the value of the insurance premiums receivable related to each year.

The cashed insurance premiums are registered in the accounting records on their collection date from the client, received either directly by the company or indirectly through intermediaries.

Receivables are presented in the financial statements at their accounting amount, less impairment adjustments for non-collection risk, if deemed necessary. Impairment adjustments related to direct insurance receivables are estimated at the amount considered irrecoverable. The company periodically assesses insurance receivables, at least once per each reporting period, and to the extent deemed necessary, constitutes an adjustment for impairment.

**1.4.9 Receivables from salvages and recoveries**

The recoverable amounts arising from the subrogation in the rights of the insured to third parties are prudently estimated at their probable collection value and are not deducted from the amount of the claim reserve.

The company regulates through internal procedures the way of estimating the recovery percentage for the salvages cases and of adjusting the recoverable value.

The company periodically assesses receivables from salvages, at least at each reporting date, and if it deems necessary, constitutes an impairment adjustment that reflects the uncollectable risk related to these receivables.

**1.4.10 Share capital**

Ordinary shares are classified as share capital when there is no obligation to transfer cash or other assets. If the company acquires the share capital (own shares), the consideration paid, including any additional paid costs directly attributable (excluding income taxes), are deducted from the equity attributable to the company's shareholders. If these shares are subsequently sold, any payment received is included in the equity attributable to the company's shareholders.

**1.4.11 Receivables or payables with reinsurers**

The benefits to which the company is entitled from its reinsurance contracts are recognized as reinsurance assets. These assets consist of short-term balances from reinsurers, as well as longer-term receivables that depend on estimated claims and benefits arising from related reinsurance contracts.

The amounts recoverable from or due to the reinsurers are evaluated in accordance with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities consist of premiums paid for reinsurance contracts and are recognized as an expense.

The amounts receivable and payable from the reinsurance activity with the same entity may be mutually compensated, as the payments to be made by both parties are similar in nature and due payable at the same time.

31 DECEMBER 2021

*(Amounts in Lei)*

---

**1 GENERAL INFORMATION (CONT.)****1.4 Significant accounting policies (cont.)****1.4.11 Receivables or payables with reinsurers (cont.)**

Receivables and payables to reinsurers denominated in foreign currency are recorded in the accounts in both lei and foreign currency. Exchange rate differences from revaluation are registered in income and expense accounts in a similar manner to direct insurance receivables.

**1.4.12 Cash and cash equivalents**

Cash and cash equivalents include cash on petty cash, bank accounts and bank deposits with an initial maturity of up to three months.

**1.4.13 Technical reserves***a) Unearned premium reserve (UPR)*

The unearned premium reserve is calculated monthly by summing the gross written premiums related to the insurance contracts unexpired periods, so that the difference between the figure of gross written premiums and this reserve reflects the gross premiums related to the part of the calculation date expired risks. This reserve is individually calculated for each insurance contract.

For insurance contracts concluded in foreign currency, the reserves are registered in lei at the historical exchange rate from the date of entry into force of the insurance policy.

*b) Reported but not settled loss reserve (RBNS)*

The RBNS loss reserve is registered for the reported claims in instrumentation and liquidating damages and is calculated for each insurance contract for which the occurrence of the insured event was notified, starting from the foreseeable claims liquidation expenses to be made in the future. The total reserve is represented by the summing up the values of the reserve calculated for each claim file.

The elements considered in the calculation of the RBNS loss reserve are:

- the estimated value of the indemnity for the notified claim, up to the insured amount
- the expenses with the adjustment and loss assessment, related to the services provided by third parties
- the expenses related to claim payment for the services provided by third parties.

In case of indemnities or expenses estimated to be in foreign currency, they are transposed in lei by using the last day of the month exchange rate for which the reserve is calculated.

*c) Incurred but not reported claims reserve (IBNR)*

The incurred but not reported claims reserve ("IBNR") is created and adjusted periodically, but at least once at the end of the financial year, being a company's estimate based on actuarial calculations for incurred but not reported claims, in accordance with the Company's internal rules.

*d) Unexpired risks reserve (URR)*

The unexpired risks reserve is calculated based on the estimation of possible claims occurring after the end of the financial year, in case of the expenses related to the estimated future claims exceeds the unearned premiums reserve minus the deferred acquisition costs.

The notes are an integral part of Financial Statements.

**1 GENERAL INFORMATION (CONT.)****1.4 Significant accounting policies (cont.)****1.4.14 Liability Adequacy Test (LAT)**

At the end of each reporting year, tests are performed on the adequacy of the unearned premium reserve to ensure the adequacy of the UPR balance minus DAC value. In carrying out these tests, there are used the current best estimates of contracts cash flows and of the claims liquidation and administration costs. Any deficit resulting from the test is immediately recorded in the profit and loss account by canceling DAC and subsequently, if necessary, by setting up an unexpired risks reserve.

A cancellation of the DAC value, as a result of this test, can no longer be recognized later.

**1.4.15 Liabilities associated with insurance contracts**

In this category it can be found the amounts due to intermediaries, the amounts registered in advance and other due amounts in connection with the insurance contracts.

The amounts due to intermediaries are recorded in the accounting at the time of entry into force of the policy and they are settled according to the contractual conditions, under the condition of the insurance premiums to be collected.

**1.4.16 Trade and other payables**

Debts are valued at the nominal value of the amounts to be paid or at the nominal value of other means of settling the obligation.

The company's debts may result from transactions carried out in lei and foreign currency.

Trade payables and other payables include employee benefits and contributions to the state budget, payables related to investment contracts, payables due to suppliers and other payables.

*Employee benefits*

In the normal course of business, the company performs payments to the state budget and social insurance on behalf of its employees.

All company's employees are members of the pension plan of the Romanian State. These costs are registered in the profit and loss account together with the salaries.

The company does not operate any other pension or post-retirement benefit plans and has no other pension obligations.

**1 GENERAL INFORMATION (CONT.)****1.4 Significant accounting policies (cont.)****1.4.16 Trade and other payables (cont.)***Provisions for risks and expenses*

Provisions are recognized in the statement of financial position when a legal obligation arises for the company or is related to a past event and it is likely that in the future it will be necessary to consume some economic resources to extinguish this obligation.

Provisions are reviewed at the end of each period and adjusted to reflect the most appropriate current estimate. The differences resulting from the necessary adjustments are recognized in the income statement for the period.

A provision shall be registered only when:

- the company has a current obligation generated by a previous event
- an outflow of resources is likely to be required to meet that obligation
- a credible estimate of the value of the obligation can be made

If these conditions are not met, no provision is recognized in the financial statements.

**1.4.17 Revenue recognition***1) Income from gross written premiums*

The income from gross written premiums includes both collected and receivable premiums related to all insurance contracts that enter into force in the financial year and whose risks start during the financial year. If the duration of the insurance contract is longer than one year, the gross written premium represents the value of the gross premiums collected and receivable corresponding to a calendar year of the insurance contract, except for the insurance contracts stipulating the single premium, for which the gross written premium represents the value of the single gross premium related to the insurance contract.

For contracts concluded in foreign currency, the gross written premiums are highlighted in lei at the historical exchange rate from the date of entry into force of the insurance policy.

*2) Gross written premiums canceled*

The canceled written premiums include the premiums related to the canceled insurance contracts on a "case by case" basis, based on the client's request.

*3) Interest income and expenses*

Interest income and expenses for all interest-bearing financial instruments are recognized in the profit and loss account using the effective interest rate method.

**1.4.18 Acquisition expenses**

Acquisition expenses are those expenses incurred by the underwriting process. Acquisition expenses representing commissions due to insurance intermediaries are recorded in the accounting at the time of gross written premiums income registration. The other acquisition expenses are recorded in the accounting according to the principle of independence of the financial year.

The notes are an integral part of Financial Statements.

**1 GENERAL INFORMATION (CONT.)****1.4 Significant accounting policies (cont.)****1.4.19 Deferred income tax**

Deferred income tax is registered using the balance sheet method based on temporary differences between the tax bases of assets and liabilities and their accounting amounts from financial statements. However, if deferred income tax arises from the initial recognition of an asset or liability related to a transaction that at its occurrence date affects neither accounting nor taxable profit or loss, it is not recognized.

Deferred income tax is calculated using the existing tax rates at the end of the reporting period and is estimated to be applied when the deferred income tax asset is realized or when the deferred income tax liability is settled.

Deferred income tax assets and liabilities are offset when there is a legal right to offset current tax assets with current tax liabilities and when deferred income tax assets and liabilities are reported to the same tax authority.

Deferred income tax assets are recognized to the extent that a taxable profit is likely to be available in the future based on which temporary differences are used.

Temporary differences are those differences between the accounting value of an asset or a liability and its tax base. Temporary differences can be:

- *taxable temporary differences* are those temporary differences that shall result in taxable amounts when determining the taxable profit / tax loss of future periods, when the accounting value of the asset or liability is recovered or settled,
- *deductible temporary differences* are those temporary differences that shall result in deductible values in determining the taxable profit / tax loss of future periods when the accounting value of the asset or liability is recoverable or settled.

**1.4.20 Current income tax**

The company records the profit tax established in accordance with the accounting and reporting regulations issued by the Romanian Ministry of Public Finance.

The outstanding tax is the tax payable on the profit of the period, determined on the basis of the percentages valid at the date of the statement of financial position and all adjustments related to the period.

The income tax rate used to calculate the current tax as of 31 December 2021 is 16%.

**1 GENERAL INFORMATION (CONT.)****1.4.1 Significant accounting policies (cont.)****14.4. 21 Leasing contracts**

The Company applies a unitary recognition and valuation approach to all leasing contracts, except for short-term leases and low-value leasing contracts. The company registers the leasing debts related to the leasing payments and the assets from the right the assets use. For short-term leasing or for leasing for which the asset has a low value, leasing payments are registered as straight-line expenses for the duration of the contract.

**1.4 Estimates and essential accounting reasoning**

The company makes estimates and assumptions with an impact on the reported values of assets and liabilities in the next financial year. Estimates and reasoning are continuously evaluated and are based on historical experience and other factors, including expectations regarding reasonable future events in the given situations.

For the preparation of IFRS financial statements, the company makes estimates and assumptions regarding future developments that may have a material effect on the recognition and value of reported assets and liabilities, presentation of contingent liabilities at the date of financial statements and reported income and expenses preparation for that period. There is a risk that the following items may be adjusted in the following financial year, such as technical provisions, other provisions, deferred acquisition expenses, the fair value of financial assets not traded on an active market, value adjustments for receivables and other impairments.

The estimation of the final liability that would result from the claims related to the insurance contracts is the most critical accounting estimate of the company. The main assumptions used in making the estimates are:

## Technical reserves

- a) The claims files administration and the evaluation of the losses is done as close as possible to the real value (subsequent payment),
- b) The principle of linearity in the calculation of premium reserve - the premium reserve is related to the unexpired period of the risk (number of days).

## Value adjustments for receivables and other impairment losses

- a) The insurance activity receivables value adjustments are constituted according to their age, applying the adjustment percentages to the amount due according to the seniority of the uncollected receivables,
- b) The salvages receivables value adjustments are evaluated considering the legal period in which the company has the right of recovery, the costs occasioned by their recovery as well as the non-recoverable amounts as a result of incorrect documentation or due to third party causes.

The deferred acquisition costs related to the insurance contracts are distributed during the insurance contract term, similar to the premium reserve. The estimates are revised at the end of each reporting period.

31 DECEMBER 2021

*(Amounts in Lei)*

---

**1. GENERAL INFORMATION (CONT.)****1.6 Changes in accounting policies and new, revised / amended IFRS****a) IASB standards and interpretations in force for the financial year ended December 31, 2021**

The accounting policies adopted are consistent with those of the previous year, except for the following standards, amendments to existing standards that were adopted by the Company on January 1, 2021. The impact of applying these new and revised IFRS standards has been reflected in the financial statements.

***Reform of the interest rate benchmark - Stage two - IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 (Amendments)***

Interest Rate Benchmark Reform - Phase Two - IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 (Amendments)

In August 2020, the IASB published the Interest Rate Benchmark Reform - Phase Two - Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16, complementing its work to respond to the effects of the IBOR reform. The amendments provide temporary exemptions that address the effects on financial reporting when IBOR is replaced by an almost risk-free alternative (RFR).

The amendments provide, in particular, for a practical solution when accounting for changes in the basis for determining the contractual cash flows related to financial assets and liabilities, requiring the adjustment of the effective interest rate, similar to an update of the market interest rate. The amendments also provide exemptions from the termination of the hedging against the risk, including a temporary exemption from the need to separately identify the hedged component when an RFR instrument is designated in a hedging ratio of a risk component.

There are also amendments to IFRS 7 Financial Instruments: Disclosures to enable users of financial statements to understand the effects of the IBOR reform on financial instruments and risk management strategy. Although the application is retrospective, the entities do not have to make restatements for the previous periods.

***IFRS 16 Lease contracts - COVID-19 Lease Granting Concessions (Amendments)***

The amendment applies retrospectively for annual reporting periods beginning on or after 1 June 2020. Early application is permitted, including in financial statements that have not yet been authorized to be issued by 28 May 2020. The IASB amended the standard to ensure that the tenants are exempt from the requirements of IFRS 16 on the treatment of lease contracts amendments to granting concessions on rent that appear to be a direct consequence of the COVID-19 pandemic.

The amendment provides a practical solution for tenants to book any change in lease payments resulting from lease concessions related to COVID-19 in the same way that they would record the change, according to IFRS 16, if it did not represent a change in the lease contract. The practical solution can be applied only if all the following conditions are met:

- The modification of the lease payments has as result in a revised consideration for the lease contract which is substantially similar or lower than the consideration for the lease contract immediately prior to the modification.
- Any reduction in lease payments only affects payments initially due on or before 30 June 2021.
- There have been no substantial changes to the other terms and conditions of the lease contract.

***Amendments to IFRS 4 "Insurance Contracts"*** - Extension of the temporary exemption from the application of IFRS 9 adopted by the EU on 16 December 2020 (the expiry date of the temporary exemption from the application of IFRS 9 was extended to 1 January 2021 for annual periods beginning with or after 1 January 2023).

**1. GENERAL INFORMATION (CONTINUED)****1.6 Changes in accounting policies and the adoption of new, revised / amended IFRS (cont.)****b) IASB standards or interpretations that have not entered into force**

The standards issued but not yet entered into force on the date of preparation of the company's financial statements, are listed below. The company expects this list of issued standards and interpretations to be applicable at a future date.

***IAS 1 Presentation of financial statements: classification of debts as current debts or long-term debts (Amendments)***

Initially, the changes should have taken effect for annual reporting periods beginning on or after 1 January 2022, early application permitted. However, in response to the COVID-19 pandemic, the Council postponed the date of entry into force by one year, respectively to 1 January 2023, in order to give companies more time to implement the required classification changes.

The amendments are intended to promote consistency in the application of classification requirements by helping companies determine whether, in the statement of financial position, debts and other payment obligations with an uncertain settlement date should be classified as current or long-term. The amendments affect the presentation of liabilities in the statement of financial position and don't change either the existing requirements for the measurement or the recognition of any asset, liability, income or expense, or the information that entities disclose regarding these elements. The amendments also clarify the classification requirements for debts that can be settled by a company that issues own capital (equity).

In November 2021, the Council published a draft exposition (ED), which clarifies the treatment of debt subject to financial commitments to be complied with at a later date than the reporting period. In particular, the Board proposes short-term amendments to IAS 1, which effectively repeals the 2020 amendments that required entities to classify as current liabilities subject to financial commitments to be met only in the next twelve months following the reporting period if these financial commitments are not met at the end of the reporting period. Instead, the proposals would require entities to disclose separately all long-term liabilities that are subject to financial commitments that must be met only within twelve months of the reporting period.

Also, if entities fail to meet such future commitments at the end of the reporting period, additional disclosures will be required. Proposals shall enter into force for annual reporting periods beginning on or after 1 January 2024 and shall be applied retrospectively in accordance with IAS 8, while early adoption is permitted. The Council also proposed that the date of entry into force of the 2020 amendments be postponed accordingly, so that entities will not be obliged to change current practices before the entry into force of the proposed amendments.

These changes, including the ones in ED, have not yet been adopted by the EU.

***IFRS 3 Business Combinations; IAS 16 Property, plant, and equipment; IAS 37 Provisions, contingent liabilities and contingent assets, as well as annual improvements 2018-2020 (Amendments)***

The amendments are effective for annual periods as of or after 1 January 2022, with prior application permitted. The IASB has issued limited scope amendments to the IFRS Standards as follows:

31 DECEMBER 2021

*(Amounts in Lei)***1. GENERAL INFORMATION (CONT.)****1.6 Changes in accounting policies and the adoption of new, revised / amended IFRS (cont.)****b) IASB standards or interpretations that have not entered into force (cont.)**

- IFRS 3 Business Combinations (amendments) updates a reference in IFRS 3 to the Financial Reporting Conceptual Framework without changing the accounting requirements for business combinations.
- IAS 16 Property, plant, and equipment (amendments) prohibits a company from deducting from the cost of property, plant, and equipment the values from the sales of the items produced while the company prepares the asset for use, but a company will recognize such income and expenses in profit or loss account.
- IAS 37 Provisions, contingent liabilities, and contingent assets (amendments) specify what are the costs that a company includes in determining a contract cost of performing in order to determine if a contract is onerous.
- Annual Improvements 2018-2020 bring minor changes IFRS 1 First-time Applying of International Financial Reporting Standards, IFRS 9 Financial Instruments, IAS 41 Agriculture and Illustrative Examples Accompanying IFRS 16 Leases.

***IFRS 16 Lease Contracts- Covid 19 Lease concessions deriving from COVID-19 after 30 June 2021 (Amendments)***

The amendment applies for annual reporting periods beginning on or after 1 April 2021, and early application is permitted, including in financial statements that have not yet been authorized to be issued by the date of the amendment. In March 2021, the Board amended the terms of the practical solution set out in IFRS 16, which exempts tenants from applying the requirements of IFRS 16 on amending leases for leases that occur as a direct consequence of the COVID-19 pandemic.

Following the amendment, the practical solution currently applies to concessions regarding rent for which any reduction in lease payments only affects payments initially due on or before 30 June 2022, if the other conditions for the practical solution are met.

***IAS 1 Presentation of financial statements and Practical Statement in IFRS 2 Accounting Policies (Amendment)***

The changes are effective for annual periods beginning on or after 1 January 2023, and early application is permitted. The amendments provide guidance for the application of materiality reasoning in disclosures regarding accounting policies. In particular, the amendments to IAS 1 replace the requirement to present “significant” accounting policies with a requirement to disclose “material” accounting policies. Guidance and illustrative examples are also added to the Practical Statement to help apply the concept of materiality when reasoning about disclosures about accounting policies. The changes have not yet been adopted by the EU.

31 DECEMBER 2021

*(Amounts in Lei)***1. GENERAL INFORMATION (CONT.)****1.6 Changes in accounting policies and the adoption of new, revised / amended IFRS (cont.)****b) IASB standards or interpretations that have not entered into force (cont.)*****IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors: Definition of Accounting Estimates (Amendments)***

Changes take effect for annual reporting periods beginning on or after 1 January 2023, early application is permitted and applies to changes in accounting policies and changes in accounting estimates that occur on or after the beginning of that period. The amendments introduce a new definition of accounting estimates, defined as monetary amounts in financial statements that are subject to measurement uncertainty. The changes also clarify what changes in accounting estimates represent and how they differ from changes in accounting policies and the correction of errors.

The changes have not yet been adopted by the EU.

***IAS 12 Income taxes: Deferred tax on assets and liabilities arising from a single transaction (Amendments)***

The changes are effective for annual periods beginning on or after 1 January 2023, and early application is permitted. In May 2021, the Board issued amendments to IAS 12, which reduce the scope of the initial recognition exception in IAS 12 and specify how companies should register deferred tax for transactions such as leases and decommissioning obligations. According to the amendments, the exception regarding the initial recognition does not apply to transactions that, at the initial recognition, give rise to equal deductible and taxable temporary differences. It only applies if the recognition of an asset and a lease debt (or a decommissioning debt and a decommissioning asset) give rise to non-equal deductible and taxable temporary differences. The changes have not yet been adopted by the EU.

***IFRS 17 "Insurance Contracts"*** including amendments to IFRS 17 issued by IASB on 25 June 2020 - adopted by the EU on 19 November 2021 (applicable for annual periods beginning on or after 1 January 2023),

***IFRS 17 "Insurance Contracts"*** which replaces IFRS 4; effective date: annual reporting periods beginning on or after 1 January 2023

The amendments to IFRS 17 mainly consist in:

- postponement of the application from 01 January 2021 to 01 January 2023
- the exclusion of the additional scope for credit card contracts and similar contracts that offer insurance coverage, for loan contracts that transfer a significant insurance risk
- clarification on the application of the contractual service margin (SCM) attributable to the service of return on investments and services related to investments and modifications of the corresponding presentation requirements
- amendments regarding the recognition by the company that initially recognizes the losses from the onerous insurance contracts issued and of a gain from the reinsurance contracts held
- simplified presentation of insurance contracts in the Statement of financial position, so that the entities present the assets and liabilities from the insurance contracts by using the portfolios of insurance contracts than groups of insurance contracts
- the additional transitional exemption for business combinations and the additional transitional exemption for the date of application of the risk reduction option and the use of the fair value transition approach

31 DECEMBER 2021

## 2 RISK MANAGEMENT

The main activity of the company consists in the underwriting of insurance policies, respectively assuming the risks for the insured parties through the various insurance products offered. One of the main responsibilities of risk management is to ensure that the obligations assumed under the insurance policies can be honored at any time.

The company's procedure for identifying, evaluating, monitoring, managing, and reporting significant risks describes how is performed the management of the risks, potential threats to the business plan objectives. The main objectives are to maintain and protect the financial stability, reputation, and profitability of the company, in order to fulfill its obligations to customers, shareholders and other interested persons.

The measures used to control the risks are represented by the avoidance, reduction, diversification, transfer and acceptance of the risks and opportunities.

Risk management provides the framework for identifying, assessing, monitoring, and controlling risks, in order to maintain them at acceptable levels depending on the company's risk appetite and its ability to cover these risks.

Due to the specifics of its activity, the Company is exposed to the following risk categories:

- Underwriting risk
- Credit risk
- Liquidity risk
- Market risk
- Operational risk
- Reputational risk
- Strategic risk

### 2.1 Underwriting risk

The underwriting risk represents the risk of recording losses or of unfavorable modification of the obligations value due to the adoption of some inadequate hypotheses in the process of pricing and / or constitution of the reserves.

The company is concerned with reducing exposure to underwriting risk by applying appropriate insurance premium rates and diversifying its insurance portfolio, by attracting a portfolio of eligible clients from member countries where it has the right to operate in freedom of services, but also by attracting and maintaining those clients who have a low risk profile and low loss rate.

The company manages this risk through its underwriting strategy, through the application of adequate premium rates, through a high degree of the insurance premiums collection, through reinsurance agreements. The company selects its clients according to certain eligibility criteria.

31 DECEMBER 2021

*(Amounts in Lei)***2 RISK MANAGEMENT (CONT.)****2.1 Underwriting risk (cont.)**

The underwriting activity is carried out in order to ensure the diversification of the insurance risks from the point of view of the type and volume of the risk, of the domain and of the underwriting markets.

In order to properly manage the underwriting risk, the company assigns part of the assumed risks to the reinsurer. The assignment is made by proportional quotas type treaties to reduce the global exposure to risk.

In addition to the reinsurance program, the company constitutes other types of guarantee for additional coverage, such as: mortgages, jointly and severally liability contracts, cash collateral, personal guarantees of the insured parties or third parties.

The company underwrites insurance policies from class A15 - Suretyship, in Romania and in the EU member states in which it is authorized based on the freedom of services (FOS) and the right of establishment (FOE) through the Italy Branch.

The types of insurance that the Company underwrites are:

- Performance Bonds
- Bid Bonds
- Advance Payment Bonds
- Maintenance Bonds
- Money Retention Bonds

The gross written premiums in 2021, without cancellations, by types of insurance, compared to 2020 are as follows:

	<b>2021</b>	<b>2020</b>
Bid Bonds	4,250,022	1,725,050
Performance Bonds	140,257,608	153,387,146
Advance Payment Bonds	2,995,958	1,675,522
Maintenance Bonds	47,060	234,040
Money Retention Bonds	69,599	79,060
<b>Total</b>	<b>148,709,591</b>	<b>157,100,818</b>

**Sensitivity analysis**

As at 31 December 2021, the company paid claims totaling 10,297,924 lei, resulting in an average amount of paid claim of 1,471,132 lei.

The loss ratio for the financial year 2021, calculated as the ratio between the paid claims amount and the value of gross written premiums (minus cancelations) was 6.98%.

Sensitivity analysis was performed on claims paid amount, keeping the other parameters unchanged.

If the value of the claims paid would have increased by 10%, the loss rate would increase to 7.67%.

In the event of the value of the claims paid would have decreased by 10%, the loss rate would have decreased to 6.28%.

**31 DECEMBER 2021**

*(Amounts in Lei)*

---

**2 RISK MANAGEMENT (CONT.)**

**2.2 Financial risk**

The company is exposed to the following financial risks:

- Credit risk
- Liquidity risk
- Market risk, risk that includes interest rate risk and currency risk

**2.2.1 Credit risk**

Credit risk represents the risk generated by the fluctuation of the value of incoming cash flows, in case that the counterparties do not fulfill their contractual obligations, thus registering a difference between the real value of the losses and their estimated value.

The main categories generating credit risks to which the Company is exposed are the following:

- a) financial investments, by the un-fulfillment of the contractual obligations by the investment partners
- b) the reinsurance receivables, due to the possible insolvency of the reinsurers, including due to their temporary payment incapacity
- c) insurance receivables, through the debts of the policyholders outside the contractual conditions / terms

a) Financial investments

The company limits its exposure to credit risk generated by financial investments by placing its funds mainly in liquid instruments issued by counterparties that have a good credit quality and are subject to constant monitoring.

The company constantly monitors the quality of the loan and does not expect these counterparties to fail to fulfill their contractual obligations.

The company manages the credit risk related to financial instruments by diversifying its investment portfolio, so as to ensure the minimization of potential losses.

31 DECEMBER 2021

*(Amounts in Lei)***2 RISK MANAGEMENT (CONT.)****2.2 Financial risk (cont.)****2.2.1 Credit risk (cont.)**

## b) Reinsurance receivables

The credit risk related to the reinsurance receivables consists in the risk generated by the reinsurer's inability to fulfill the contractual obligations or its bankruptcy.

## c) Insurance receivables

The credit risk related to insurance receivables is insignificant because the company's underwriting policy is to issue policies only after the payment of the insurance premium by the insured and / or its collection directly in the insurer's accounts, and the policy portfolio for which the company has approved insurance premium payment in installments is reduced and considered risk-free.

**Exposure to credit risk**

The maximum exposure to credit risk is equal to the exposure from the statement of financial position at the reporting date, as follows:

	<b>31 December 2021</b>	<b>31 December 2020</b>
Other financial assets, including receivables from insurance	185,309,453	62,897,869

**2.2.2. Liquidity risk**

Liquidity risk represents the risk of unfulfillment of investments and of other assets, in order to settle the financial obligations at their maturity.

The company invests only in those assets whose risks are easy to identify, to evaluate, to quantify and to manage and which participate mainly in the calculation of the solvency capital requirement.

The company monitors the liquidity risk through the liquidity ratio, calculated according to the regulations in force.

The asset portfolio is also managed based on the legal requirements in force regarding the assets admitted to cover the gross technical reserves and the liquidity requirements in order to ensure the continuation of the activity at any time.

The company has a reasonable portfolio of highly liquid assets (cash and cash equivalents), as well as a portfolio of investments in government bonds and short-term deposits.

In this respect, the company undertakes adequate measures in order to have sufficient liquid assets, that can be used as a means of payment, to honor the short-term payment obligations at any time and with reasonable costs.

**31 DECEMBER 2021**

*(Amounts in Lei)*

---

**2 RISK MANAGEMENT (CONT.)**

**2.2 Financial risk (cont.)**

**2.2.2 Liquidity risk (cont.)**

The company's assets placement is carried out taking into account the preponderance of the engagements currencies and the maturity structure of the debts, in order to ensure a correct diversification and to avoid excessive dependence on any type of asset, issuer or group and geographical area, the final scope being to maintain a high degree of security, a profitability at least at the market level, ensuring at the same time the available liquidity necessary for the normal and continuous activity of the company, based on the principle of business continuity, basic Solvency II principle.

The company manages the liquidity risk by:

- constant supervision of the financial situation of the company, by hedging the maturities of assets with the liabilities
- constant supervision of the company's liquidity in relation to its financial resources
- avoiding the concentration of the financial assets portfolio on counterparties
- monitoring future cash flows in order to ensure liquidity for fulfilling contractual obligations
- monitoring the liquidity ratio in accordance with the legal provisions in force
- constant management of company's assets and liabilities performed in order to identify a possible liquidity risk.

The liquidity risk to which the company is exposed is low due to the significant share of liquid assets.

**2.2.3. Market risk**

The market risk is the risk of incurring losses or an unfavorable change in the financial situation, which directly or indirectly results from fluctuations in the level and volatility of assets, liabilities, and financial instruments market prices.

The main categories of market risk to which the Company is exposed are the following:

- *Currency risk* represents the risk of recording financial losses due to the deviation of the real value of the exchange rates from the estimated value. In order to avoid losses arising from movements with a negative impact on the exchange rate, the Company applies a policy of correlating foreign exchange assets and liabilities

- *Interest rate risk* represents the risk of registering some financial losses due to the deviation of the real value of the interest rate from the estimated value

31 DECEMBER 2021

*(Amounts in Lei)***2 RISK MANAGEMENT (CONT.)****2.2 Financial risk (cont.)****2.2.3 Market risk (cont.)**

In order to reduce these market risks, the company considers at least the following measures:

- congruence of assets with obligations
- follow-up of the exchange rates evolution in which the investments are made and the reserves are calculated
- follow-up of the collection of foreign currency receivables according to the contractual clauses

***Exposure to currency risk***

The assets and liabilities of the Company are expressed mainly in foreign currency. The company is exposed to currency risk because of the difference between assets and liabilities, on each currency, the Company constantly monitoring the correlation of assets and liabilities in foreign currency.

The assets and liabilities of the Company as at 31 December 2021 are presented in the following table:

31 DECEMBER 2021

*(Amounts in Lei)***2 RISK MANAGEMENT (CONT.)****2.2 Financial risk (cont.)****2.2.3 Market risk (cont.)***Currency risk exposure - sensitivity analysis*

The main currency risk comes from the EUR exposure, the company's assets in EUR representing approximately 67% of the total assets, and its obligations in EUR 77% of the total obligations.

An analysis of the sensitivity on foreign exchange risk, assuming the depreciation of RON against EUR by 10% and considering that all other variables remain constant, leads to an increase in the Company's result by 7.284.816 lei, according to those presented below:

	<b>31 December 2021</b>	<b>10% RON depreciation towards EUR</b>	<b>Impact</b>
EUR / LEI exchange rate	4.9481	5.4429	0.4948
Total Euro assets	262,719,777	288,991,755	26,271,978
Total Euro debt	189,871,618	208,858,780	18,987,152
Net currency position	72,848,159	80,132,975	7,284,816

*Exposure to interest rate risk*

The company does not hold variable interest rate financial instruments. The company has invested part of its assets in term deposits held with banks and in government securities intended to be held until maturity. Due to the fact that these investments are short and medium term, the exposure to interest rate risk is reduced.

31 DECEMBER 2021

## **2 RISK MANAGEMENT (CONT.)**

### **2.3 Other risks**

#### **2.3.1 Operational risk**

Operational risk is the risk of losses due to inadequate internal processes or malfunctions, by its own staff or IT systems, or as a result of external events. The operational risk is inherent in all the company's activities.

The company's operational risk management procedures consider each type of event that may generate significant risks and the manner in which they occur, in order to eliminate or reduce financial or reputational losses.

#### **2.3.2 Reputational risk**

Reputational risk is defined as the risk of losses as a result of deterioration of the company's reputation, its image or a negative perception from policyholders, shareholders, or authorities.

The reputational risk source may come from but not limited to the following: management decisions, products, activities, or actions of the company's employees.

Reputational risk can be:

- direct, when it is caused by any company's behaviors that could have a negative impact on the interested parties' perception on the company
- indirect, when the degradation of the reputation is caused by a risk from another major category of risks (operational, strategic, liquidity, credit risk, market risk)

In order to carefully monitor the company's reputational risk at level, the following elements are considered: the number of negative articles published in the media, the number of appearances, the number of complaints received from clients/beneficiaries.

#### **2.3.3 Strategic risk**

Strategic risk is the risk of incurring losses or an unfavorable change in the financial situation due to strategic decisions taken by management.

31 DECEMBER 2021

*(Amounts in Lei)***2 MANAGEMENTUL RISCURILOR (CONTINUARE)****2.4 Capital management**

The impact of the Solvency Capital Requirement (SCR) and the Minimum Capital Requirement (MCR) on the value of own funds is assessed periodically, in accordance with the requirements of the Solvency II regime.

For the determination and calculation of the Solvency Capital Requirement (SCR), the company uses the standard formula.

As at 31 December 2021, compared to 31 December 2020, the values of SCR, MCR and eligible own funds, determined according to the Solvency II regime, are as follows:

	<b>31 December 2021</b>	<b>31 December 2020</b>
SCR	111,086,257	74,997,189
MCR	27,771,564	22,988,828
Own funds	219,132,299	182,176,739
Ratio of Eligible own funds to SCR	197%	243%
Ratio of Eligible own funds to MCR	789%	792%

Detailed information on the valuation principles used and the calculation of capital adequacy indicators is presented in the "Solvency and Financial Statement Report (SFCR) 2021", published on the company's website ([www.onix.eu.com](http://www.onix.eu.com)).

<b>Balance as at 31 December</b>	<b>-</b>	<b>12,417,218</b>

The company considers that the Incurred but not reported claims reserve registered as at 31 December 2021 is sufficient to cover the payments for claims that occurred but they were not yet notified up to this date.

The company calculated the Incurred but not reported claims reserve using the „*expected loss ratio*” method, taking into account the paid indemnities and the gross written premiums both estimated in the next year’s Annual Business Plan, resulting in a reserve of 9,944,388 lei as at 31 December 2021 compared to a reserve of 2,756,284 lei as at 31 December 2020.

31 DECEMBER 2021

*(Amounts in Lei)***22. TRANZACTII CU PARTI AFILIATE**

During 2021, the company carried out transactions with affiliated parties, respectively Egadi Company SRL, based on a contract for subleasing of an office space, achieving a rental income of 2,400 lei, the same as in 2020.

**23. CONTINGENT ASSETS AND LIABILITIES****a) Legal actions in court**

The company is involved in several disputes arising from its insurance activity, and their settlement is considered not to have a significant impact on the outcome of operations or financial position.

**b) Taxation**

The tax system in Romania, with a low degree of predictability, can be modified without prior public consultation. In case of differences of interpretation of the tax legislation, the tax authorities may treat certain aspects differently. In Romania, the fiscal year remains at disposal for fiscal verification for 5 years. The company's management considers that the fiscal obligations included in these financial statements are correctly calculated.

**26. EVENTS SUBSEQUENT TO STATEMENT OF FINANCIAL POSITION DATE***Armed conflict between Russia and Ukraine*

Following the end of the financial year, in February 2022, an armed conflict has started between Russia and Ukraine, which has affected the two countries' economies and among other things, resulted in a significant influx of refugees from Ukraine to neighborhood countries (including Romania) as well as a series of sanctions imposed by the international community on Russia and some of Russian origin companies. The medium and long-term impact of this conflict and of the sanctions imposed on Russia cannot be anticipated with sufficient accuracy at this time.

Given that the company does not have activities significantly dependent on the conflict area or affected by sanctions (especially Russia, Ukraine, Belarus), neither in terms of acquisitions nor sales, we consider that the company's ability to continue its activity in the predictable future shall not be significantly affected, therefore these financial statements are not affected by this event subsequent to balance sheet date.
